- Supports up to 40KG
- VESA 200mm x 200mm
- Mount directly to the wall
- Great for digital signage solutions
- Easy to install

The ErgoMounts EMFX200 is designed to mount heavy duty monitors & TV's to the wall on a slim and cost effective mounting plate.

Suitable for screens with a VESA 200mm x 200mm interfaces and weighing up to 40Kgs this compact mount attaches the screen just 18mm away from the wall and locks the monitor securely into place.

For years the EMFX200 has been one of our leading TV Wall Mounts due to it's adaptability and simplicity to install. Attach one of the mounting plates to the back of your TV, the other to the wall and hook the two together. Once hooked a security bolt holds the two pieces in place for a secure and stable installation. When looking to perform maintenance to the screens or replace it with a different model all you have to do is release the security bolt, unhook the screen and then re-attach the EMFX200 plate to your new monitor.

Notes:

Installation & Maintenance

The ErgoMounts Planned Preventative Maintenance Programme (PPM) covers bi-annual visits from one of our highly trained technicians. They ensure all of our arms are working as intended and replace or repair any worn parts. This often extends the working life of the mounts by several years resulting in significant savings. Contact us to find out more about our installation and maintenance plans.

**Interested In Selling
Our Products?**

We're always looking for new businesses to take on and sell our exciting portfolio of products. Our resellers receive a range of exclusive benefits including combined marketing, trade accounts and access to our team of experts.
