

10squared

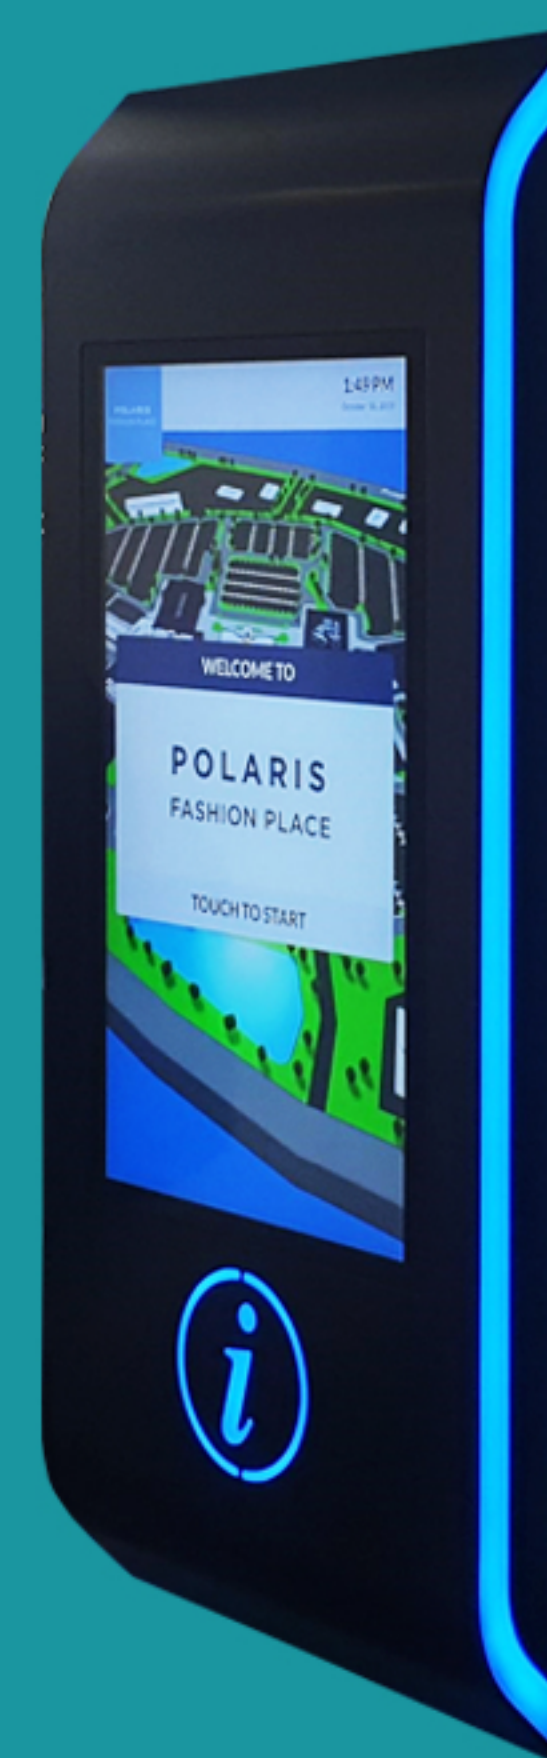

Contour

The Contour from 10 Squared has been designed to give a contemporary and slimline aesthetic to interactive wayfinding allowing your content and brand to take centre stage.

Features

The Contour utilises a flush fitting PCAP touchscreen available in a variety of sizes from 32 inch to 55 inch and includes eye catching LED illumination.

Using industrial grade LCD panels and rugged PC technology ensures that the unit is suitable for prolonged hours of use in harsh public realm environments.

Construction

The fabricated aluminium housing and integration of all technology within, allow the Contour to be a purely independent proposition with little need for additional infrastructure.

With an architectural powder coat finish of choice and the addition of LED illumination and vinyl options, the Fresco can be easily adapted to suit any individual brand requirement.
